

TARGET 1:

In target 1 there were 3 task given regarding designing a website of online retail which were done rightfully.

TASK 1:

(Design a minimalistic website layout for easy navigation) in this a basic front page was made of online website with product listing with their prices. These things were done in brackets application with html javascript and CSS.

TASK 2:

(Implement user registration and basic login functionality.) Under this login and registration button is made in which user add the email and password and gets login or register accordingly. The buttons were created using JavaScript and basic styling using CSS.

TASK 3:

(Create a product listing page and enable users to add products to their cart.) The products which were listed in main page will now have two buttons add to cart and buy now if user clicks on buy now an alert message will be popped up and if user clicks on add to cart then the cart count will be increased and product list will be shown in pop up in product list.
